BRIDGING *the* DISTANCE

Distance education fills engineering program needs

Most of us have the problem of not being able to be in two places at the same time—but not Ned Weckmueller. Weckmueller, associate professor in UW-Stout's industrial management department, pioneered a cooperative distance education program between UW-Stout and UW-Platteville in which he taught an engineering class to students at Stout and was, at the same time, teaching Platteville students who saw him on a 71-inch TV screen.

His efforts were part of a distance education cooperative agreement between the two universities, which were the joint recipients of a UW System grant to set up the program. With the grant, similar facilities were established at both locations, and engineering courses began to be transmitted in January 1995.

This two-way education is made possible by screens

and cameras at both schools. Each school has a 71-inch TV screen (*monitor*) and document cameras (*ceiling-mounted video cameras*). The instructor wears infrared tracking on both the front and back so that the camera can follow movements.

Last semester, as part of the cooperative agreement, Platteville delivered two engineering courses to Stout. Joanne Wilson, Platteville's associate dean of the College of Engineering, and Asama Jadaan, of that department, both taught Mechanics of Materials; and Platteville's John Krogman taught Statics while Weckmueller taught Engineering Economy.

"This system serves two useful purposes," said Pete Heimdahl, associate dean of the School of Industry and Technology. "It provides a way for Platteville to provide key engineering courses to our students while we at

Stout are putting our engineering faculty together. In addition, it supports our pre-engineering agreement with Platteville in which students may take the first two years of the engineering curriculum at one university and finish at the other. Courses which Platteville requires in its first two years, but not offered at Stout, are conducted by distance education and vice versa."

One UW-Stout student took the Statics course in this mode last semester. He will transfer to Platteville this fall to complete his studies in mechanical engineering.

The program will continue this fall with Platteville teaching a section of Mechanics of Materials and one of Statics to Stout students, and Stout again sending Engineering Economy to Platteville. Weckmueller will resume his role, teaching in two locations simultaneously.

"It provides a way for Platteville to provide key engineering courses to our students while we at Stout are putting our engineering faculty together."

Peter Heimdahl

Ned Weckmueller teaches students on two campuses simultaneously.

UW-Stout courses offered through America Online

Students anywhere in the country are now able to take selected courses at UW-Stout in the comfort of their own home, thanks to computer technology and a commitment to new course delivery systems.

UW-Stout and the Electronic University Network are offering courses through America Online, making them available to virtually anyone with a home computer. Participants are provided with America Online's latest software in DOS, Windows or Mac formats to match their equipment.

Christopher Smith, outreach program manager in UW-Stout's Office of Continuing Education/Extension, developed the service used for the first time last spring. Assistant professor Carole Flint and lecturer Susanne Johnston, both from UW-Stout's English department, were the first instructors to teach on the university's new "virtual" campus on America Online. They teach technical writing to students as far away as St. Louis.

"This is an ideal medium for this type of course," said Flint, who has taught technical writing at UW-Stout for 20 years. "Each week students check their electronic mail, post responses to folders in our bulletin board environment and send us assignments in attached files," she said.

"Students who participate online tend to get a great deal more personal interaction with faculty," Johnston noted. "They get personal responses to their messages within hours of posting." Johnston and Flint agree, however, that the personal interaction also leads to more work for instructors than usual in typical classroom settings.

"This is just the beginning for exciting new ways of delivering instruction in the information age," Smith said. "Outreach managers have dreamed of the day when it would be cost effective to provide courses to people bound by place and time, unable to attend classes without leaving their home communities and jobs." He added that because of such programs, people in a variety of fields will be able to update their skills without disrupting their careers or families. "Individuals across the country, now choosing not to access university campuses because of distance, disability or family obligations, can now take courses using their modem-equipped computer to participate in classes," he said. "Online students meet with their instructors in real time, socialize with other students, and obtain

"Individuals across the country, now choosing not to access university campuses because of distance, disability or family obligations, can now take courses using their modem-equipped computer to participate in classes."

Christopher Smith

instructional resources using the electronic conferencing facilities of the Electronic University Network and America Online."

Smith said he has been pleased with the response for classes planned for the fall. "Registration is still open," he said. "We are certain that, as more people learn about the availability of courses online, enrollments will grow."

"Taking courses beyond the campus is not new in itself," Smith said. "We have been sending instructors to distant locations for many years, and using new technologies to extend the university's reach as they become available and financially feasible. But here, through the use of home computers, neither the instructor nor the student is burdened by

frequent or lengthy travel to classrooms or downlink sites."

Smith said the university extension office is expanding its online offerings quickly. Full degree programs are anticipated. Non-credit in-service training offerings are also being delivered online for employees of state agencies using the Office of Continuing Education/Extension's new Education Bulletin Board Server.

Students who are interested in learning more about the current course offerings also have online access to information about the university. An unexpected result has been numerous inquiries about UW-Stout's traditionally delivered graduate programs.

Persons who want more information may contact Smith at 715/232-2693.

The ultimate tool

Technology transfer program will use supercomputer to aid manufacturers

UW-Stout's widely recognized manufacturing technology transfer program has received the "ultimate tool," with the announced purchase of a Cray supercomputer.

The J-916 computer is being purchased through a partnership between Stout and Phillips Plastics Corporation, Chippewa Valley Technical College, Cray Research and the Wisconsin Department of Development. DOD has awarded the university an initial grant of \$500,000, Phillips will provide an additional \$100,000 in support, and Cray Research has pledged a product discount and technical assistance.

The unit will be housed in the Stout Technology Park at the Origen Center, a research and development facility

owned by the Origen Group, an affiliate of Phillips Plastics. The computer will be used to serve small to midsize manufacturers in product design analysis and manufacturing problem-solving simulations. It will be linked to the Stout campus where it will be used by students and faculty in programs such as manufacturing engineering, applied math, and physics.

"This is symbolic," said Chancellor Charles W. Sorensen. "It shows that a school our size can be in the forefront of manufacturing technology, that business doesn't have to look to the big, major universities." The chancellor pointed out that the acquisition supports the university's long-standing technology transfer program, through which dozens of small companies have been

assisted in re-tooling with the latest manufacturing technology.

Bob Cervenka, CEO at Phillips, said at a press conference announcing the purchase, that the computer is "the ultimate tool" for simulated manufacturing processes. He noted that the Cray computer could do in five minutes what would take other computer systems up to 27 hours to do.

During the next five years, about 450 companies are expected to be served through the computer. The project will leverage more than \$5 million in private and other public funds.

"This is symbolic. It shows that a school our size can be in the forefront of manufacturing technology..."

Charles W. Sorensen

Military mobilization

Project will strengthen apparel industry, aid military

UW-Stout's department of apparel, textiles and design is the recipient of a Defense Logistics Agency contract to assist in developing a plan to strengthen U.S. apparel manufacturing as well as serve the United States military. The contract was awarded on the basis of a proposal written by Donna Albrecht and Jacqueline Robeck, professors in the department.

"A strong U.S. apparel industry is important for military mobilization as well as for providing a faster response to military ongoing special clothing needs," an Army spokesperson said, adding that "the goal is having the right product in the right place at the right time—at a competitive value."

To achieve this goal, the Department of Defense selected 24 agencies in the country as Apparel Research

Network (ARN) partners, one of which is UW-Stout.

The net contract is \$50,000 for the first year and \$50,000 for the next two consecutive years. The purpose of the initial three-year contract, according to Albrecht, is to develop a "roadmap" of projects for the next seven years that will strengthen the U.S. apparel manufacturing industry.

"The objective is to reduce the number of dress uniform orders treated as 'special measurement,'" Albrecht said. "This will be possible by using existing CAD (computer aided design) technology to make available, by special order, sizes beyond the current size tariff as well as commonly needed alterations which are impossible to accomplish after the garment is made."

Albrecht said that computer technology makes it

possible for extensions of the size tariff and variations of the standard pattern to be resident on computer for access whenever needed. This saves the cost of repeating the same pattern alterations.

"This speeds the process of producing the majority of out-of-tariff (*unusual size*) uniforms which do not require individually sized patterns," Albrecht said.

The project will extend electronic grade rule tables of the U.S. Army dress uniform components to the limit of larger and smaller sizes determined necessary by historical data, according to Albrecht.

"Computer integration is the key to strengthening the apparel industry," Albrecht said. "Currently, CAD systems are the most favorably received and well developed."

"Computer integration is the key to strengthening the apparel industry."

Donna Albrecht

Home Economics school renamed

New name reflects evolution of the discipline

Home economics—cooking and sewing—right? What a difference a century makes. What was once Stout's Training School for Domestic Science Teachers evolved into the School of Home Economics, and has now, by recent action of the UW System Board of Regents, been renamed the School of Human Environmental Sciences.

"A primary purpose of that (*first*) unit was to prepare home economics teachers," Esther Fahm, dean of the school, said. Today there are many specialized degree program offerings which lead to a variety of professions.

Programs lead to professional careers in business, industry, education, and community and government agencies. Programs are science-based and integrate the social, biological, natural, developmental and managerial sciences for the purpose of improving the human condition and the quality of life and service, according to Fahm, and so the name—Human Environmental Sciences.

"This new name reflects the evolution and development of our professional field of study in higher education," Fahm said. "It builds upon the rich tradition of disciplines that our school has historically offered."

Provost George DePuy said he did a study of 19 similar schools around the country, and only six still maintain the term "home economics" in their name.

"This name change, from Home Economics to Human Environmental Sciences, reflects the fact that the discipline that was called home economics has evolved far beyond its original definition," DePuy said. "Most other schools of home economics at other universities have already changed their names."

Other universities using the name human environmental sciences include University of Alabama, University of Arkansas, East Carolina University, University of Kentucky, University of Missouri-

Columbia, University of North Carolina-Greensboro and Oklahoma State University.

"The administrative team, faculty, staff and students join me in announcing with esteem this new era of development in our field at UW-Stout," Fahm said. "The name change is a momentous event for our school."

"This new name reflects the evolution and development of our professional field of study in higher education."

It builds upon the rich tradition of disciplines that our school has historically offered."

Esther Fahm

School of Human Environmental Sciences

Undergraduate Programs

- apparel design/manufacturing
- dietetics
- early childhood education
- family and consumer educational services
- food systems and technology
- hospitality and tourism management
- human development and family studies
- retail merchandising and management

Graduate Programs

- food science and nutrition
- home economics
- hospitality and tourism

The recent name change has raised a number of questions from alumni of the School of Home Economics. The following questions are the two most commonly asked, with answers from Esther Fahm, Dean of the School of Human Environmental Sciences.

Q&A

Q: What professional titles will graduates from the School of Human Environmental Sciences use?

A: Individual professional titles may be determined in many ways. However, for years our graduates have frequently used their area of specialization, certification and/or occupational roles as professional titles. Graduates have called themselves dietitians, apparel designers, hotel managers and early childhood teachers. Our graduates will continue to utilize such titles.

Family and Consumer Educational Services is the general degree program within our school. Human Environmental Sciences serves as an "umbrella" descriptor of the academic programs array and focus of our unit as a whole and not necessarily the professional title for graduates.

Q: Since the profession adopted the name "Family and Consumer Sciences," why did the school not adopt the same name?

A: At UW-Stout, a major goal of the name change was to reflect the focus and evolution of academic programs that have already occurred within the school, and to position the unit for the 21st century in an increasingly complex society and higher education environment. Academic programs have become increasingly specialized within our school. They align with the unifying focus and conceptual framework of the American Association of Family and Consumer Sciences as well as with that of several other professional organizations such as the American Dietetic Association, the Council on Hotel Restaurant and Institutional Education and the American Apparel Manufacturers Association. The name Human Environmental Sciences reflects a broad scope of programs, specializations and professional alignments within the school.

Laboratory heaven

Lab modernization grant provides students a world of opportunities

Einstein. Currie. Newton. All help teach in UW-Stout's physics lab. Those are some names of the 14 new computers in the recently modernized lab, one of three physics labs at UW-Stout.

With a \$90,000 lab modernization grant from Stout, the physics department was able to update the lab and make the latest in computer technology available to students, allowing them to access information worldwide. The lab has been made more aesthetically comfortable as well with carpeting, lower ceilings and lights to reduce glare. But 90 percent of the grant went to purchasing top notch high-tech equipment such as multimedia computers with sound cards and CD-ROMS, a color scanner, a color printer, a ceiling-mounted camera and video capture capability.

"We can take any video source and 'capture' or convert it to digital and store it in our computer," Jim Pejsa explains. These video clips can be used later in instruction modules. Pejsa, professor of physics, has been integrally involved in setting up the new lab.

A video of a basketball free throw could be "captured" and saved to use for a physics projectile motion lesson. It can be viewed in motion or frame by frame.

"We're excited about it," Pejsa says. "It's a very advanced computing lab, especially as far as our Internet activity." He notes that the software the lab uses is highly sophisticated and connects easily to the "World Wide Web."

"We can provide our students with the absolute latest software available to enable them to access information worldwide," he says. Computer graphics, color, sound and animation draw students into an exciting world of science and technology that few would have dreamed

possible 25 years ago.

The lab is also used to teach other classes within the department such as astronomy and meteorology. Students can get a satellite image of the latest weather maps anywhere in the world. Pejsa notes that Purdue University has an excellent weather processor that UW-Stout students use often.

Curriculum has been designed for the World Wide Web, and instructors can find teaching modules to use for students as well.

Lab reports are all done with computers, Pejsa says. Students should become very familiar with computer spreadsheets because they are ubiquitous in the business world. They are especially adaptable to physics lab reports.

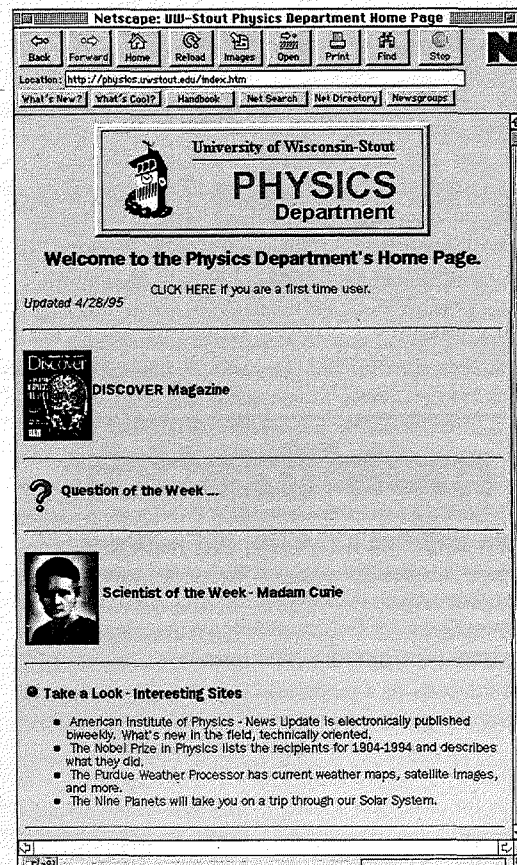

"More and more is being produced on CDs in physics," Pejsa says. One CD can contain all the information from six physics textbooks with lots of room left over.

Pejsa, who has been in love with computers for 25 years, says he had always wanted to use them for teaching, but they just weren't powerful enough. "Now there are all kinds of ways to use them in teaching. We are doing some amazing things."

An object or a visual aide placed on a table beneath the ceiling-mounted camera can be viewed by students on four television screens located strategically in the lab.

Pejsa, who has been teaching for 20 years, says the new technology makes teaching even more exciting. "And we are constantly developing new curriculum to make use of this high technology," he says.

People in the UW-Stout physics department call their new lab "Laboratory Heaven."

Check out the Physics home page on the World Wide Web. The URL is <http://physics.uwstout.edu/htm.index>

"We're excited about it. It's a very advanced computing lab, especially as far as our Internet activity."

Jim Pejsa

Learning by design

Students collaborate on product design

Two large manufacturers of sporting goods may find themselves using design ideas from UW-Stout art and design students.

Industrial design students within the department of art and design have been involved in a number of projects in conjunction with well-known national companies. Two such collaborative projects have been with Rollerblade Inc., of Minnetonka, Minn., and PUMA USA, of Brockton, Mass.

Projects like these are one reason so many students are drawn to the art and design department at UW-Stout. According to Paul DeLong, art program director, there are more than 600 students in the program, and there's a waiting list for some concentrations.

"It is one of the largest undergraduate art programs in the state," DeLong said. "And it's the only industrial design program in the whole UW System." DeLong said that the only other such program is at a private art school.

The project with Rollerblade was initiated by UW-Stout alumnus Todd Olsen, senior industrial designer at the company. The endeavor was supported by a small grant, and the company provided product samples and informational support. Olsen, a 1983 graduate from New Ulm, Minn., advised and directed students and critiqued their work.

Olsen said UW-Stout students gave a diverse, fresh look to Rollerblade products. "They did an excellent job," he said. "Our management was impressed."

Benjamin Pratt, instructor of the industrial design class, said the project was good for students in that "they saw ways in which the skills they are learning can be used professionally. And it was great to work with a company so open to creativity and new ideas."

This was the second time UW-Stout students worked with PUMA. Last year students worked on ideas for footwear. This year, juniors in Robert Rabinovitz's

industrial design class designed a new sport or activity and the gear that would go with it, from the clothing to the arena.

Rabinovitz said students were innovative with their ideas for both sports and equipment. Designs included a virtual reality shoe, shoes for walking the tracks of roller coasters and power walking shoes which incorporate an elastic band between the hands and shoes.

Todd Ellis, a UW-Stout graduate from Green Bay, is employed as a designer at PUMA and engineered this collaborative effort. "We're always looking for new ideas," he said, "and we wanted input from the Midwest. Stout students generated a lot of new ideas."

"Todd (Ellis) advocated for the selection of his alma mater due to its up and coming industrial design program which is improving every year," said David Miller, director of research and design at PUMA.

"The final presentations surpassed all expectations," Miller said. "As director of research and design at PUMA USA, I can assure you that we will definitely try to do this project next year or the following year."

Puma must, in fact, have been impressed. The company recruited another UW-Stout student, David Stender, a design student and athlete, after seeing his work in the program.

"[Students] saw ways in which the skills they are learning can be used professionally. And it was great to work with a company so open to creativity and new ideas."

Benjamin Pratt

Making News

Newsmakers

Judy Jax, a professor in the department of human development, family living, and community educational services, recently received a National Leader Award from the American Association of Family and Consumer Sciences. This award identifies and honors people who have made significant contributions to the profession and association through their involvement with AAFCS. Jax received the Wisconsin Association of Family and Consumer Sciences Leader Award in 1994. She was nominated for the National Award by that association.

Wayne Nero, business, has received the UW-Stout Outstanding Educator Award from the Menomonie Area Chamber of Commerce. Selection is based on voting by students at the SSA spring elections. The award was presented to Nero at the Chamber's annual Student/Educator Recognition Banquet, which also recognized the university's top 25 students.

UW-Stout went to the east coast to select its first women's soccer coach. **Lisa Petrucelli**, interim head coach at NCAA division 1 University of Maine-Orono last season, will build the first-year program beginning this fall. Petrucelli is finishing her graduate work in Sports Management. A center midfielder for four years at Smith College in Northampton, Mass., Petrucelli was a graduate assistant coach at the University of Maryland for two years and an assistant coach at the University of New England-Biddeford for a season.

Donna Weber has been named Affirmative Action Officer at UW-Stout. Weber, a member of UW-Stout's psychology department, began her duties Aug. 1. She received a bachelor of arts degree in sociology and psychology from Viterbo College in 1964; and a master of education degree in professional development from UW-Stout in 1987. Weber has taught at UW-Stout since 1984. She has previous experience in accounting, human resources and public relations; and was an employment interviewer and counselor for the Minnesota State Employment Service.

Sabbaticals granted to staff members

Ten UW-Stout faculty members will receive sabbaticals during the 1995-96 school year through recent action by the UW System Board of Regents. First semester sabbaticals have been awarded to Susan Hunt, art and design; Loretta Thielman, mathematics; and Richard Tyson, social science.

Second semester sabbaticals have been awarded to Tom Baldwin, technology; Todd Boppel, art and design; James Herr, communications, education and training; Stephen Snyder, social science; and Janice Timmer, food and nutrition.

Full-year sabbaticals for 1995-96 were granted to Don Baughman, psychology; and Sue Stephenson, counseling and psychological services. Sabbaticals are granted by the board to recognize teaching efforts and excellence. Purpose of the program is to enhance teaching, course and curriculum development, research or other scholarly activities related to instructional programs.

Retirees honored

Chancellor Charles W. Sorensen recently honored retirees from UW-Stout at a campuswide reception. Pictured here are (front row) Lorraine Trainor, Student Center custodial; Doug Stallsmith, industrial management; Bob Spinti, technology; and Frank Pershern, technology; (back row) Chancellor Sorensen; Marie Hermann, dining services cook; Chuck Skeels, residence halls custodial; Sten Pierce, physical education; Art Muller, technology; and Don Chatman, business.

Departmental structures change

UW System has approved the following changes in the departmental structures at the university:

- In the School of Education and Human Services, the four departments of counseling and psychological services; education; psychology and rehabilitation, will be realigned into the three departments of education, school counseling and school psychology; psychology; and rehabilitation and counseling.
- In the School of Liberal Studies, the name of the department of mathematics has been changed to the department of mathematics, statistics and computer science. The departments of speech and music have been merged into a new department of speech communication, foreign languages, theatre and music.

Teaching and service awards announced

Mary Flynn, associate professor of psychology at UW-Stout, is the recipient of the university's Outstanding Teaching Award this year.

Judy Spain, director of residence life, received the Outstanding Service Award.

Both were presented with the awards at the May commencement ceremonies. Each award includes a \$500 honorarium.

Flynn earned her B.A. degree at UW-Eau Claire and received her Master of Education degree at UW-River Falls. She went on to obtain a Ph.D. in education from the University of St. Thomas in St. Paul.

She has taught at UW-Stout since 1983 and is currently program director of the public relations/public information specialization at UW-Stout, as well as director of the psychology program. She is also a consultant for Eau Claire School District and Greendoor Graphics in Eau Claire.

Spain has been director of residence life since 1972. She came to Stout in 1967 from the University of Northern Iowa, Cedar Falls, where she obtained her M.S. degree in student personnel administration. Her B.S. degree from that university is in library science.

Spain's duties include advising residence hall governments, supervising educational programs and faculty involvement in the residence halls to complement classroom learning, and developing and maintaining a concept of "community" for residence halls communities. She is also involved in preparing residence hall budgets, selecting and supervising personnel, and developing space utilization plans for 614,000 square feet in nine residence halls.

Both individuals are members of numerous professional, academic and civic organizations.

Flynn

Spain

Promotions, tenure and emeriti announced

Promotions in rank, tenure designation and emeritus status for UW-Stout faculty and staff members were announced recently by Chancellor Charles W. Sorensen, following action by the UW System Board of Regents.

Promoted from associate professor to professor are Ayub Hossain, mathematics; Kimberly Kluver, business; Michael Nicolai, speech; Robert Price, art and design; Robert Salt, human development, family living and community educational services; George Smeaton, psychology; and Richard Vomela, technology.

Promoted from assistant professor to associate professor are T. Kathleen Cochran, apparel, textiles and design; Peter D'Souza and Bharath Josiam, hospitality and tourism; Mary DeMaine, art and design; Marian Ellison, mathematics; Ellen Emanuel, rehabilitation; Julie Furst-Bowe, communication, education and training; Margaret Nelson, music; Donna Stewart, industrial management; Dennis Vanden Bloomen, business; and Norman Zhou, technology.

Vomela, Cochran and Vanden Bloomen were also granted tenure, along with Paul Ngo, psychology; Gary Rockwood, counseling and psychological services; and Judy Rommell, human development, family living and community educational services.

Named professor emeritus by the regents were Richard Miller, mathematics; Arthur Muller, Frank Pershern, Robert Spinti and Henry Thomas, technology; J. Anthony Samenfink, human development, family living and community educational services; A. Gary Searle, communication, education and training; and Douglas Stallsmith, industrial management.

Donald Chatman, business; Douglas Gingrich, psychology; Dean Long, industrial management; and Dale Mallory, telecommunications and technology, were named associate professor emeritus.

Stennet Pierce, physical education and athletics, was named assistant professor emeritus.

Emeritus status is an honorary designation by the regents for retired unclassified staff members.

Dietetic internship accredited

The university has received developmental accreditation of its dietetic internship program from the American Dietetic Association's Commission on Accreditation/Approval for Dietetic Education, a specialized accrediting body recognized by the Commission on Recognition of Postsecondary Accreditation and the United States Department of Education. The association also recognized the commitment of Anita Pershern, dietetics program director; and the food and nutrition department, chaired by Janice Timmer, in support of dietetics education.

The dietetic internship prepares dietetics professionals who are experts on food and nutrition, and promotes optimal health and nutritional status of the public. The need for dietetics practitioners is expected to increase as the role of nutrition in health and the benefits of nutrition intervention in the prevention and treatment of diseases continues to be documented.

Proud of our success

I was pleased, but not surprised, that the Stout University Foundation recently received, for the second year in a row, the prestigious Circle of Excellence award from the Council for the Advancement and Support of Education. This national award underscores the fund-raising success by the foundation for fiscal year 1993-94. Many thanks to our alumni and supporters who helped make this possible. You can read more about the award elsewhere in this edition of Outlook.

We are also proud of a number of other success stories. Despite severe budget cuts imposed this year by the state, we continue to move forward with innovating and exciting programs. For example, we recently announced that we will be getting a Cray supercomputer through an initial grant from the state Department of Development. This will not only strengthen our research capabilities in manufacturing engineering and applied math, but provide an excellent educational opportunity for our students as well. Our nationally recognized technology transfer program will benefit from this gift by providing assistance to hundreds of small to medium sized manufacturing firms in research and development efforts. This is yet another excellent example of a UW-Stout partnership with the state of Wisconsin, private companies, and a technical college to provide excellence in education and service to this state and nation.

Technology is also assisting our outreach efforts, especially through growing distance education programs.

You will note that we have changed the name of our School of Home Economics to the School of Human Environmental Sciences. This reflects a shift in the home economics field that has evolved from its original definition. It also recognizes that we are moving to new disciplines, rooted in Stout's tradition but changing with the progress of the times.

We have been busy preparing for Homecoming this fall, as you can see by the schedule in this edition. I hope you are planning to pay us a visit, not only to participate in these many activities, but also to witness first hand the many positive changes that are taking place at your university.

Chancellor's Message

Charles W. Sorensen

"Despite severe budget cuts imposed this year by the state, we continue to move forward with innovating and exciting programs."

Operating budget figures released

An operating budget for UW-Stout totaling \$77 million was approved recently by the UW System Board of Regents.

The budget covers the fiscal year beginning July 1 and ending June 30, 1996. Of the total operating budget, fewer than half of the funds come from state tax dollars. The balance is funded by fees, gifts and grants.

This year's budget contains \$50 million in salaries and fringe benefits for the university's 967 permanent employees and graduate assistants. The 1995-96 unclassified compensation plan includes a 1 percent average increase effective July 1, 1995.

Other items in the budget include \$12 million for supplies and services, \$4 million for equipment, and \$11 million for campus-based financial aid and debt service.

Diane Moen, university controller, said a full-time undergraduate Wisconsin student at UW-Stout will pay approximately \$5,177 for tuition, fees, room and board during the 1995-96 academic year. Moen said that represents an overall increase of 4.9 percent from last year. Tuition was increased by 6.5 percent, and fees, room and board increased approximately 3.9 percent.

The tuition figure includes a 1 percent tuition surcharge for special technology which will be used to improve student access to items such as computer workstations, e-mail, software and training.

The approved budget eliminated the sunset date for the instructional laboratory modernization, general computer access and classroom modernization programs, and thus continues the annual funding of \$430,000.

Foundation Report

Foundation receives second national award

The Stout University Foundation Inc. has been named to receive the top national award for educational fund raising for the second consecutive year.

The award was presented July 11 by the Council For the Advancement and Support of Education at the group's annual meeting in New York. The foundation is the fund-raising arm of UW-Stout. Patricia Reisinger is the director.

Titled Circle of Excellence, the award was based on fund-raising efforts of the foundation for the fiscal year 1993-94. Approximately 1,000 colleges, universities and independent schools submitted data. Ninety-eight were selected. UW-Stout was the only public university named in Wisconsin.

In announcing the award, UW-Stout Chancellor Charles W. Sorensen praised the work of Reisinger, the foundation staff and Board of Directors, and cited new programs the foundation had introduced to serve the university.

"Last year's award was a first for the foundation in its more than 30-year history," Sorensen said. "To repeat in consecutive years is remarkable." Foundation assets jumped more than \$3 million during the year. Growth allowed the foundation to expand its assistance to the university in areas that include scholarships and faculty and staff grants. The grant program enables staff and students to pursue research, equipment needs or special projects related to the mission of the university.

When the foundation was organized in 1963, two scholarships totaling \$200 were presented. In 1994, 270 students received more than \$195,000 of support.

"It's gratifying to receive the award. It acknowledges that assistance to the university community reached a new level," said Reisinger, who was named director in 1991. "Obviously, our donors believe in Stout. They share our commitment."

The \$3.78 million received during the year represented a 75 percent increase in alumni contributions; a 60 percent increase for corporations; and a 30 percent increase for parents. Overall, gifts increased 46 percent.

In 1993, the foundation launched a \$10 million

"It's gratifying to receive the award.... Obviously, our donors believe in Stout. They share our commitment."

Pat Reisinger

Attending the CASE award ceremonies were (l to r) Joyce Bisbee '62, who resides in New York and is the Vice President for Consumer Program, Booklyn Union Gas; Pat Reisinger and Linda Funk '76, Stout University Foundation board member. Linda was in New York for the International Fancy Food and Confection Show as Director, National Product Communications, Wisconsin Milk Marketing Board.

campaign to transform Fryklund Hall into an advanced manufacturing center. That campaign is at \$8.2 million.

David W. Wendt, Madison, is president of the Foundation's 35-member Board of Directors.

Dahlgren and Hormel Professors named

Four UW-Stout faculty members have been approved for named professorships following action by the UW System Board of Regents.

Appointed Dahlgren Professors are Susan Hunt and John Perri, both professors in UW-Stout's art and design department.

Appointed Hormel Professors are Donald Baughman and Michael Ritland, both professors in UW-Stout's psychology department.

Selection for the professorships is made on the basis of an individual's outstanding abilities and promise. The Dahlgren Professorships are two years in length and provide \$7,500; the Hormel Professorships are one year in length and provide \$4,500.

Funds for these professorships were obtained through the Stout University Foundation Inc.

The Dahlgren professorships are in honor of Reinhold and Borghild Eng Dahlgren, 1917 and 1918 UW-Stout graduates, who established and endowment upon their deaths.

The award provides resources to improve teaching. This may include professional travel, attendance at special meetings and conferences, supplies, equipment, books, reports, periodicals,

computer time, or secretarial or student help.

The Hormel professors are funded by the Geo. A. Hormel and Co., Austin, Minn., and are used to support each recipient's professional activities.

Cox is Arthur R. Cabot Executive Resident

Sue Cox '77, recently promoted to senior creative/technical manager within the Creative Division of McDonald's Corporation marketing department, visited with faculty and students on campus this spring to share information about McDonald's creative and technical programs. She met with students in courses related to marketing, foods and nutrition, graphic arts, industrial design and packaging. The evening presentation was open to the campus and community.

Her appearance on campus was underwritten by the Arthur R. Cabot Executive Residency Endowment. Through this program, corporate leaders spend one or more days on campus involved in faculty development, interacting with students and presenting seminars for constituencies.

A 17-year veteran of McDonald's, Cox joined the company immediately after graduation from UW-Stout with a degree in home economics in business. Her first position was in the product development department as a home economist in the test kitchens. In 1987, she moved to the

creative department where she has been technical advertising supervisor and manager, and is currently the senior manager. She is responsible for the overall layout, production and post-production, including reviewing and approving all creative elements containing McDonald's food. As the resident "food guru," she is the key contact for all point of purchase print, including outdoor, food footage and truck graphics that utilize any McDonald's food photography both domestic and international.

In her spare time, she is a member of the Global Packaging Graphics Team which is developing new worldwide packaging graphics for all existing and developing McDonald's markets.

Arthur R. Cabot was a successful pet products manufacturer. His son, Scott, is a 1978 UW-Stout graduate and is currently president of Vanguard Consulting Group, Deerfield, Ill.

Furnishings for the Louis Smith Tainter House

Jack and Marjory Steiner Milnes graduated from the Stout Institute in the '30s. Jack's father had been a professor at Stout, and their love of the institution has been evidenced by their continued support of the Steiner/Milnes Scholarship and, most recently, by the gifts of home furnishings for the Louis Smith Tainter House. In memory of Mrs. Wilson, who was an adviser to Marjory's sorority, the Milnes donated their furnishings and artwork.

The Stout University Foundation is honored to have received the furnishings from the Milnes, and welcomes alumni and friends to stop by to enjoy the acquisitions.

The Louis Smith Tainter House is home to the alumni and foundation. It also serves as a special space for cultural events and for entertaining alumni, friends and corporate visitors to the university.

Marjory passed away in December 1994.

Consolidated Papers Foundation supports graphic arts management

The UW-Stout graphic arts management program (a concentration in the Industrial Technology major) has been awarded a \$5,000 grant from the Consolidated Papers Foundation Inc. (CPFI). The contribution is intended to fund the purchase of paper for use in graphics printing labs to assist in teaching students printing techniques and quality control measures in the printing process.

The program is the largest of its kind in the Midwest, currently enrolling more than 300 students. Graduates of the program assume managerial jobs in printing plants or establish careers as print estimators, buyers, service representatives and a host of other affiliated activities.

The grant is the first from CPFI. "We have selected this funding opportunity to demonstrate our support to the printing industry and its importance to paper manufacturing," George W. Mead, CPFI president, said in announcing the

gift. "Good printers make good customers to the papermaking business."

Organized in 1951, the Consolidated Papers Foundation Inc. is funded through an annual contribution from Consolidated Papers Inc., and earnings from endowments worth more than \$36 million from George W. Mead I family members. The foundation distributes between one and two million dollars to organizations each year.

According to Jim Herr, coordinator of the graphic arts management concentration, "This generous gift is important as it provides funds to purchase an adequate paper supply for the year for the needs and experiences of the students. We are most appreciative of the Consolidated Papers Foundation gift to this program."

Price Professorship announced

Chancellor Charles W. Sorensen has announced the establishment of the Maybelle Ranney Price Endowed Professorship which has been made possible through Maybelle's generous bequest of \$60,000. In honor of her life and love of teaching, Sorensen said it was most appropriate to identify the funds to honor and retain faculty who represent the best scholarly research, teaching and community service. The first Maybelle Ranney Price Professorship will be awarded in 1996.

Maybelle Ranney (Brechlin) Price, formerly

of Menomonie and Eau Claire, died this past year at Bradenton, Fla. She was a 1945 graduate of UW-Stout and taught high school at Roberts, Wis., and Savannah, Ill., before becoming a civilian employee of the U.S. Government in Okinawa. She returned to Price Wisconsin and taught at Fond du Lac and Eau Claire before moving to Florida, where she was active in community and church activities.

Carafoli participates in imaging technology project

The Imaging Technology Team invited John Carafoli, nationally known food stylist and writer, to campus for a three-day workshop this past June. Styling food is precise work and requires patience and huge amounts of ingenuity. "This is part of the business, if things go wrong, you've got to correct them immediately," explained Carafoli to the attendees. He worked with teams of students and faculty from printing, packaging, art and design, food-related fields and photography. Also attending the workshop were food stylist professionals from several major food companies.

The Imaging Technology Project, funded by the Foundation, begins its third year of operation with assignments ranging from concept to completion of menus, posters, packages, training manuals, and/or table tents for clients. The students work in teams of four with two faculty/staff consultants. The teams do not receive credit for the projects nor do the consultants receive a salary.

Empowering women of color

Barbara Burdick, coordinator of "Empowering Women of Color" noted that the group celebrated its first year of activities. Twenty-six American women of color participated in this year's activities.

Goals of the project included strengthening leadership abilities; bridging cultural roots, both within individual cultures and cross culturally; strengthening retention rates; and improving graduation rates.

Successes have been apparent this year, as several of the women have been elected to positions of leadership throughout the campus including Women in Management, the Stout Student Association (SSA) and multicultural organizations. Campus and community support has been important and well received. The Foundation funded the program for 1994 - 1997.

Grant launches CFS research career

Thomas H. Heiman, recipient of a 1994 Stout Foundation Grant, is the first person in this country to conduct formal studies on the vocational rehabilitation implications of Chronic Fatigue Syndrome (CFS). Heiman has been invited to become project director of the largest, most comprehensive grant from the National Institute for Allergies and Immune Disease, NIH, ever implemented in the United States, concerning CFS. It will be the first large-scale, community based study of the prevalence of CFS, and will involve a stratified random sample of 26,000 persons from the Chicago metropolitan area.

This study will be conducted over a period of four years and will provide the most thorough and statistically significant data on CFS. Of special interest will be the study of gender, ethnicity, age and socioeconomic status. The study will be conducted by DePaul University with Dr. Leonard Jason, professor of psychology and principal

Heiman

investigator. Heiman stated he would be pleased to hear from UW-Stout alumni, faculty and students concerning this CFS research. Contact him at the Department of Psychology, DePaul University, 2219 North Kenmore Ave., Chicago, IL 60614-3504.

High mileage vehicle competition

The High Mileage Vehicle Competition was funded by the Stout University Foundation three years ago, and continues. It is organized by the UW-Stout Technology Education Collegiate Association. Doug Walrath, vice president, coordinated the project and stated "This year's competition was a resounding success. I am pleased to say that we have received excellent feedback from the students who competed, their teachers, UW-Stout faculty and TECA members."

Twenty three technology education high school clubs competed in the contest which was held at the UW-Stout Technology Park the last weekend in April. Winners of the stock division were Medford High School team members Brian Egle, Dan Lammar and Mandy Clarkson. The New London High School team won the modified division. Winning team members are eligible for a \$250 freshman scholarship to attend UW-Stout. The scholarships are provided by the Stout University Foundation and the UW-Stout Technology Education Association.

Consider a memorial gift

Gifts to the Stout University Foundation Inc., in memory of deceased alumni, faculty and friends are a means of honoring their memories.

How many times have you had to think of an appropriate gift for a friend or loved one to celebrate a birthday or anniversary? Several alumni have found the answer. They donate funds to the Stout University Foundation Inc., in honor of special occasions.

One donor, who wishes to remain anonymous, explained "My parents were celebrating their 55th anniversary. And they said they didn't need anything and wished to just celebrate with their friends and family. They said that at their stage in life they were downsizing. Therefore, when I told them we were interested in contributing to the foundation in honor of their anniversary they were thrilled! In fact, they shared that idea with most of the relatives, and

the contributions will continue to grow to produce a permanent scholarship in their names."

Gifts to the Stout University Foundation are tax deductible.

Information is available about how to include the Stout University Foundation Inc. in your will and how to establish a permanent endowment for scholarships, faculty development or supplies and equipment.

Please contact David Wiensch, planned giving officer, for more information. He may be reached at:

Stout University Foundation Inc.
P.O. Box 790
Menomonie, Wisconsin 54751-0790

Or call him at 715/232-1151.

Outstanding, distinguished alums to be honored

Recipients of UW-Stout's Distinguished Alumni Award and Outstanding Alumni Award will be honored during a homecoming brunch.

The Distinguished Alumni Award will be presented to Geraldine Raisler Hedberg, Janesville; and Paul Husby, Brazil.

Receiving the Outstanding Alumni Award will be Karen Wagner Strauss, Gaithersburg, Md.; David Ogilvie, Hortonville; and Laurie Barteck Honnigford, W. St. Paul, Minn.

The Distinguished Alumni Award is for UW-Stout graduates who have furthered their careers while making a contribution to their community, state and nation. The Outstanding Alumni Award recognizes leadership and exceptional achievement in a career field, service to humanity and loyalty to the university.

Hedberg, a 1951 graduate of UW-Stout with a bachelor's degree in dietetics, is the president of the Hedberg Foundation, Inc., in Janesville. She serves as a Trustee of the Direct Marketing Education Foundation, N.Y. and on the boards of JMJ Holding Co., Libertyville, Ill.; University of Wisconsin Comprehensive Cancer Center; and the Southern Wisconsin Community Foundation.

Hedberg has served as a lieutenant in the Women's Army Medical Corps; a home economist with the National Livestock and Meat Board and Kroger Foods; vice president of finance, science related materials; and executive vice president of Lab Safety Supply Inc., a company she and her husband founded.

As managing director of 3M Brazil, Husby is responsible for operations of the wholly owned subsidiary.

Husby began his career with 3M as an industrial engineer in 1969 in St. Paul, Minn., after graduating from UW-Stout with a bachelor's degree in industrial technology.

Strauss is a public health nutritionist for the Indian Health Service in Rockville, Md. She directs the activities of approximately 200 nutritionists and dietitians employed or contracted by the service or tribal governments; and provides leadership to improve services in community and clinical programs for American Indians and

Alaska Natives.

Strauss received a bachelor's degree in education from the University of Minnesota in 1976. She graduated from UW-Stout in 1981 with an M.S. in food science and nutrition.

Ogilvie received a bachelor's degree in industrial technology in 1981. He joined Pierce Manufacturing, Appleton, Wis. as an industrial engineer. Pierce is the largest custom fire truck builder in the United States.

Ogilvie has also served as manufacturing services manager, corporate vice president, and manager of engineering. As vice president of engineering, he leads the design engineering group.

Honnigford is executive director of the PVC Geomembrane Institute in St. Paul, Minn. She develops the marketing campaign for trade shows, educational seminars and a newsletter.

Honnigford received a B.S. in clothing, textiles and design from UW-Stout in 1985. Her career began as a patternmaker with an apparel manufacturer.

Honnigford is a nationally recognized expert on geosynthetics—fabrics and membranes used in such civil engineering applications as highways, retaining walls, landfills, wastewater treatment facilities and hazardous waste containment facilities. She was regional sales manager for Environmental Protection Inc., Mancelona, Mich., before assuming her current position.

Fellowship, scholarship help grads advance

The UW-Stout Alumni Association awarded one \$1,500 fellowship and two \$750 graduate scholarships at its March board of directors meeting. The graduate scholars are continuing their education at UW-Stout.

Cathie A. Weissman Ed.S. '92, the 1995 Robert S. Swanson Fellowship awardee, is currently working on her Ph.D. in teaching and learning at the University of North Dakota, Grand Forks, N.D. This fellowship will be used to support her doctoral dissertation research.

Her research involves two issues relative to UW-Stout and its graduates: time and number of credits needed to complete a bachelor's degree.

"This information will benefit Stout in terms of institutional planning and improving the undergraduate educational experience," according to Weissman.

"The Robert S. Swanson Fellowship is a prestigious award and it is an honor to receive," Weissman said. "Receiving this award will demonstrate an interest in the research I am conducting and aid in the advancement of my career goal of working at a university either in teaching or institutional research."

Weissman received an education specialist degree in guidance and counseling in 1992. In addition, she has volunteered in numerous musical groups and student organizations.

Graduate scholarships were awarded to Lucy McNamara and Robert P. Ocker.

Since entering the guidance and counseling program in the summer of 1994, McNamara has carried a full load of graduate credits and is a graduate assistant in Research Promotion Services.

McNamara feels her most significant contribution to the community has been her involvement as an ANAD group facilitator. ANAD is a national eating disorder group which provides support for people struggling with eating disorders as well as providing support to their family and friends who seek to understand the implications of eating disorders.

Upon graduation, McNamara plans to secure a position in a clinic that specializes in eating disorders.

"My own recovery from an eating disorder convinced me that there are an insufficient number of eating disorder programs to handle an ever-increasing need to provide help to individuals

struggling with eating disorders," said McNamara. "This position will allow me to help individuals who struggle with eating disorders using the knowledge I will obtain at UW-Stout and my own personal experience to complement and facilitate growth, change and self-acceptance in others."

McNamara and a fellow student have started an eating disorder group on the UW-Stout campus, Body and Soul, sponsored by the University Counseling Center.

McNamara graduated in 1985 with a bachelor's degree in business finance from UW-Eau Claire.

Ocker has been a volunteer with a variety of groups such as churches, schools, camps, hospitals, daycares, preschools and charity organizations, empowering others through programs of Education through Entertainment, with Knuffle Schmoover and The Rocker,

"While volunteering for community affairs, I have been able to help foster a positive climate by empowering people in an entertaining and educational manner utilizing creative puppetry, storytelling, song and dance," according to Ocker. "I have volunteered on many occasions to help children and community groups of diverse and cultural backgrounds."

According to Ocker, his career goals and objectives are a process of lifelong education experienced by all human beings as they develop and accept responsibility for their lives.

"My goals are to foster a positive climate empowering all students to become lifelong learners," said Ocker. "In doing so, I plan to involve programs that will help schools and communities get back to the fundamental core values of honesty, respect and personal integrity."

Currently, Ocker works as an assistant in the International Programs' Student Services. He received a B.S. in organizational communication from UW-Eau Claire in 1991.

Alumni board adds two

Connie Hines, president of the UW-Stout Alumni Association, has appointed JoAnn Prange '86 and William L. Burmesch BS '72, MS '80 to its board of directors.

JoAnn Prange received a degree in business administration. During her undergraduate years, she was active in student government. Prange is a past SSA president and made many contributions to improving student life during her term in office. Prange is currently working for the Wisconsin Department of Health and Social Services, Division of Economic Support as a quality improvement coordinator. She conducts and organizes training sessions throughout Wisconsin on quality improvement, strategic planning, empowerment of the work force and many other topics. She has been employed by the state for eight and a half years and has held several positions. Prange resides in Madison.

William L. Burmesch is a manufacturing manager for IBM Corporation of Rochester, Minn. In this position, Burmesch has profit and loss responsibility for the multimillion dollar,

Burmesch

Prange

used computer equipment business. His responsibilities include managing the 100,000 square foot facility and 60 staff. He is responsible for planning, directing and coordinating production, inventory control, warehouse, shipping, receiving and customer order fulfillment operations for the facility. He is a member of the American Production and Inventory Control Society. Burmesch and his wife, Julia '79 (Hier) and their daughter, Leigh, reside in Northfield, Minn.

Another great year for the Alumni Association

Greetings! The fiscal year for the UW-Stout Alumni Association ended June 30, and I would like to share selected highlights from 1994-1995.

Alumni gatherings were held in several locations throughout the United States, including Beaver Creek, Colo.; Chicago; Boston; Grand Rapids and Marquette, Mich.; Charleston, S.C.; Nashville, Tenn.; Houston; and Appleton, Menomonie and Stevens Point, Wis. These gatherings were a combination of receptions at professional association shows and conferences, and social events.

Alumni Association graduate scholarships were awarded to Barbara K. Miller and Terasha A. King, and the Robert S. Swanson Fellowship was awarded to Terri Loree.

Members of the Alumni Board welcomed

President's Message

Connie Hines

graduates and introduced them to the Alumni Association during the August, December and May commencement ceremonies. Ninety-nine faculty and staff members were honored by the Alumni Association for their years of service at a reception during Homecoming '94. (Currently, UW-Stout employs 913 faculty, academic and classified staff).

Distinguished alumni Lawrence Doyle '70, '74 and Judy Kreutzer '68, '69, '72; and outstanding alumni Michael Hubbard MS '89 and Joseph Pine II '80 were also recognized at Homecoming '94. These special alumni were hosted by faculty members, and their visits to UW-Stout included sharing work experiences in the classroom and with the Alumni Board, dining with the Chancellor and participating in the parade. The distinguished and outstanding alumni were honored at a brunch award ceremony attended by their families, friends and faculty.

In closing, I would like to extend a warm welcome to new board members JoAnn Prange '86 and William Burmesch '72, '80.

Reunion '95

Class of 1985 Front (l-r) James Flitsch, Barbara Freund Flitsch, Thomas Lee, Tammy Lee, Jennifer Hilgendorf Montean, John Montean. Back (l-r) Tony Mans, Charles Moder, Dawn Graunke Moder, Michelle Gerhardt Hendrey, Raymond Hendrey.

Class of 1965 Front (l-r) Maryann Drezdon Darzano, Diana Kadinger Gullickson, Myra Schlegel Douglass, Joyce Ziegler Freiwald. Back (l-r) Charles Brenner, Frank Darzano, Tony Gullickson, Tom Freiwald.

Class of 1975 Front (l-r) Dianne Sundin Johnson, Marilyn Dean Bell, Janet Axtell. Back (l-r) Robert Peterson, Joanne Peterson, Teri Lynn Giese Fuentez, Barry Fuentez.

Class of 1970 Front (l-r) Kristine Daub Brekke, Barbara Souther, Robert Harmon, Susan Bell Harmon, Helen Miller Frank Manning, Georgia Schlegel Larsen, Christine Voll. Back (l-r) Myrna Steelandt, Steve Steelandt, Norman Rieman, John Myer, Curtis Peters, Kirsten Hansen.

Class of 1955 Front (l-r) Ken Rieck, Delores Saucy Rieck, Ron Thiede, Verna Dunn Thiede, Nyla Bock Musser, Ann Ritzinger Zittleman, Don Zittleman, Jo Gritt. Second (l-r) Wendien J. Schmalz, Colleen Schmalz, Colleen Ceminsky Hodges, Fred Hodges, Marv Kufahl, Janice Kufahl, Beverly Hoffmann, Frank Hoffmann. Third (l-r) Harold Levery, Mary Asp Levery, Kathryn Garvin Brown, Celia Fritz Lausted, Jean Baker Kaeding, Kay Wedin Krueger, Edward Treise, Lois Treise. Fourth (l-r) Rose Peper Nelson, Keith Nelson, Allan Loew, Joeline Chyrt Loew, John Rynders, Barbara Brown Rynders.

Class of 1934-1936 Front (l-r) Chris Voll, Herbert Voll, Ruth Bubeck Voll, Hughitt Moltzau, Orvetta Braker Moltzau, Ruth Schmidt, Evelyn Alvord Schulz, Delta Schroeder Woinowsky. Second (l-r) Sue Wilken, Phyllis Lauermann Wilken, Charles Johnson, Fred Curran, Barbara Sack, Louise Brenner, Herb Woinowsky. Third (l-r) Ben Lohrie, Ann Lohrie, Kris Hansen, LaVerne Hansen, Ralph Betterley, Jane Ecke Betterley, Harold Sack, Carl Brenner.

Class of 1944-1946 Front (l-r) Toshio "Buster" Hagiwara, Arlene Hoeth Quilling, James Dillman, Theo Benkert Dillman, Mary Dorick McKanna, John Milbrath, Florine Lindow Milbrath, Jean Andrew Anderson, Hazel Helm, Eleanor Busse Johnson, Jean Daniels Melchert, Richard McKinney, Marian Voight McKinney, Mildred Zimmerman Seidl, Mary Riggert Sims. Second (l-r) Peggie Curtis Boettcher, Dora Campbell Serflek, James Quilling, James Peterman, Vernelle LaPage Peterman, Nancy Roberts Reinhardt, George Zimmerman, Dorothy Schoenwald Zimmerman, LaVerne Mertz Anderson, Jane Huntzicker, Mary Thomsen-Broderick, Ruth TeBeest Mattson, Lloyd Mattson, Alice Finger Wolk, Ruth Madison Harmon, Edward Sims. Third (l-r) Ariand Boettcher, Joe Serflek, Margaret Pace Trudell, Mary Engbretson North, Eileen Algiers Litka, Eleanor Kopischkie Weber, Elizabeth Lee Ferry, Frank Ferry, Kay Michaels Barnard, Joan Quilling Adams, Charlotte Luther Sawyer, Bernard Broderick, Caroline Johnson Hicks, Bob Burke, Ruth M. Hood, Lila Danielson Gilmore, Marcelle Sander Gresch. Fourth (l-r) Stuart North, Raymond Litka, Rita Ryan Lucius, Neva Harmeling Kleist, Charles Kleist, Dave Barnard, Harlan Adams, James Hicks, Pauline Miller Luckey, Tom Luckey, Joyce Wildner Cave, John Gresch.

Chancellor Charles W. Sorensen greets Steve '70 and Myrna Steelandt, Sand Lake, Michigan.

Peter D'Souza (above) leads the popular wine tasting session, while James Hicks, husband of Caroline Johnson Hicks '44, Cambria, California, studies the wine list.

James '87 '88 and Barbara '86 Freund Flitsch, Bloomington, Minnesota, learn about Computer Integrated Manufacturing.

Reunion was magic

After a year of planning and preparing for the two days of activities for the almost 200 returning graduates, spouses and friends, another reunion weekend has come and gone. What a great turnout we had. We missed those of you who couldn't make it.

It didn't take long for returning alumni to see the changes: changes in friends and changes on campus. Soon after the hugs and catching up on news, alumni, spouses and friends toured the campus.

Conversations with alumni reminded me of how much the campus, programs and Menomonie have changed. The building one alum remembered as the Student Center may have had totally different meaning for another. Older alumni remembered taking courses from faculty whose names now identify the residence halls that housed the younger alumni.

After the campus tours, groups were updated by the deans on the new happenings within the various programs. For those fortunate enough to get a ticket to the limited seating gourmet dinner, the evening ended with a taste of the work in the Quality Food Production course taught by Philip McGuirk.

For some alumni, campus housing was included in reliving their student days. Saturday programs offered individuals an opportunity to experience current programs on campus and to meet current faculty, staff and students, who enjoyed the opportunity to meet graduates and hear about their experiences while at Stout and the life it prepared them for.

Overall, the weekend was a hit with those who attended. While talk centered around Stout's changes, the memories remained the same. A special thank you to everyone who participated in Reunion '95.

Director's Message

Suzette F. Hittner

Thanks

The UW-Stout Alumni Association thanks the following faculty and staff for volunteering their time and expertise to the programming during the 1995 Reunion weekend.

The Association extends its appreciation to the following individuals for their contributions toward assuring a sustained intellectual relationship between alumni and the university.

Alumni in the News

Management team comprised of Stout alumni

Landmark Builder's Group, Inc. boasts six Stout grads in its eight-member upper management team

Rice Lake, Wis. Speaking as a Stout graduate himself, William Tradewell '78 (*Industrial Education*), President and CEO of Landmark Builder's Group Inc., says that the selection of his management team was a "carefully calculated step." When asked why the Landmark Builder's management group is so heavily laden with Stout graduates, Tradewell remarked: "The answer is simple...My partner Dann Kann '70 (*Vocational Education*) and I knew from our own experience that a Stout education completely prepares one for entrance into the job market. Stout grads gain the knowledge and skills required to perform competently, with a high degree of professionalism. A Stout education is thorough and comprehensive. We were confident that our Stout employees would perform at the level necessary to raise our company to its fullest potential. And we were right. We've grown immensely in the past four years and plan to maintain that growth rate - with bright prospects for the future."

And the growth has been obvious. Landmark Builder's Group Inc. began four years ago with only two Stout grads in its complement. Tradewell and Kann targeted their business in the residential construction market. Projects ranged from home remodeling and additions to home design and construction. At this time, the company grossed \$250,000 in annual sales. The real growth began in 1992 when the company became a Wisconsin corporation. Operations then shifted to a commercial base.

Today Landmark Builder's operates as a full-service construction company. Departments include Architectural, with specialties in areas such as design/build and ADA services; Construction Management, operated by Dave Manske '72 (*Industrial Technology - Construction*) and Dave Nyseth '93 (*Construction*); Project Estimating, managed by Steve Zemaitis '75 (*Industrial Technology*); General Contracting, managed by Manske; Personnel and Equipment, managed by Kann; and Marketing, managed by Mary Johnson Tradewell '77 (*Home Economics in Business*).

These departments successfully work together to provide single point responsibility for the client. Target

Landmark Leadership Team Front (l to r) Steve Zemaitis, Dann Kann, Bill Tradewell and Dave Manske. Back (l to r) Dave Nyseth and Mary Tradewell.

markets include the hospitality industry with emphasis on motel development; the health care industry—hospitals, nursing homes and clinics; offices; golf course development; schools; churches; and retail buildings. Projected gross sales for 1995 is \$8.2 million. Tradewell and Kann feel that this success rate is due to their management team—a team whose reputation for accuracy and professionalism is founded on a solid Stout education.

When asked about future prospects for Landmark Builders, Tradewell and Kann said that they foresee the company moving into the institutional and industrial

markets. Also they plan to become involved in larger commercial projects, maximizing the potential of the Architectural department. The company recently got a start in broadening its scope by becoming a Star Building Systems dealer. This move, compatible with their business plan, enabled them to furnish their market with architecturally designed steel buildings. Tradewell and Kann agreed that they have been more than pleased with their decision to hire Stout graduates in all company departments. As their company expands, they plan to continue this trend - adding additional professionalism and competency for their customers' satisfaction.

We were confident that our Stout employees would perform at the level necessary to raise our company to its fullest potential. And we were right.
William Tradewell

Petersons named Outstanding Dietetics Educator

Maija Petersons, associate professor in the department of Consumer Resources and Technology at Western Michigan University, has been named a recipient of the Outstanding Dietetics Educator Award from the American Dietetic Association.

Petersons

Petersons was one of 35 educators selected nationwide to receive the honor, which was presented for the first time at the annual regional meeting of the Dietetic Educators of Practitioners April 1 in Sioux Falls, S.D. The organization, which is affiliated with the American Dietetic Association, is composed of teachers who specialize in dietetics instruction.

The award recognizes the teaching, mentoring and leadership activities of faculty and preceptors in dietetics education programs accredited and approved by the American Dietetic Association. Award winners must be members of the American Dietetic Association and demonstrate leadership in national, state or district dietetic association

activities. Award criteria also included community service, honors received, scientific and professional presentations, and articles published.

Petersons was nominated by a colleague from Michigan State University and supported by letters from three WMU students. She received particular recognition for developing a dietetics internship program at the university four years ago. Under the program, eight students who receive degrees in dietetics each year are sent through a series of rotations at food service facilities in area hospitals and clinics to receive hands-on experience in clinical nutrition, community nutrition and food service management.

Petersons also was cited for activities that included serving as president of the Southwest Michigan District Dietetic Association. She also served as treasurer of the Michigan Dietetic Association, and chaired the association's bylaws, policies and procedures committee.

A WMU faculty member since 1977, Petersons earned a bachelor's degree from the UW-Stout. She received a master's degree from the UW-Madison and a doctoral degree from Ohio State University.

Owolabi committed to adult education

Although he was born on a cocoa farm in Nigeria and didn't attend school himself until he was 10 years old, Isaac Owolabi is helping hundreds of adults in this country earn their college degrees.

The UW-Stout graduate is associate dean of the School of Professional and Adult Studies at Montreat Anderson College in Montreat, N.C. Before establishing the Montreat program last year, Owolabi headed the adult program at Marian College in Fond du Lac, Wis., for six years. Under his leadership, the growth of both programs has been outstanding.

At Marian, enrollment grew from 200 students to 1,300. In his first year at Montreat, he put together the curriculum, hired staff and then managed to attract 280 students to the program. Degree work is offered primarily to older students in Charlotte and Asheville who hold regular jobs during the day. By December 1995, Owolabi hopes to have 500 students enrolled and by 1998, 3,000.

Owolabi

Considering what he has accomplished since his arrival in this country in January 1983, his goal is realistic.

After encouragement and financial support from his paternal grandmother in Nigeria, Owolabi left the farm for school. He became a math and physics teacher. At Stout, he earned an undergraduate degree in marketing education in 1984 and a master's degree later that same year in vocational education.

With meager support from his family back in Africa, but with a wealth of encouragement from his friends here, Owolabi struck out for the University of Minnesota where he hoped to gain a doctorate in marketing education. He achieved that goal in 1987. After one year as an instructor at a Florida junior college, Owolabi took the position at Marian.

Owolabi is committed to adult education. "Most adults entering our program are doing it to remain competitive in their jobs. While the traditional student views higher education to be the next step in life, the adult student looks at a college degree as a marketable commodity."

Owolabi and his wife, Abigail, have four children. Not surprisingly, she has earned a degree in social work since joining him in this country in 1985. Owolabi is a member of the UW-Stout Alumni Board.

Slaney's career "takes off" with CA One

Tim Slaney '84, general manager of the New Orleans International Airport, was awarded the CA One Unit of the Year at a recent general managers meeting. The award is presented to the unit based on overall appearance, financial status, improvement, cleanliness and employee morale. Slaney's unit was selected from more than 40 CA One units.

CA One is the nation's second largest food service and retail operator at airports. Last year it won the food service contract for the Los Angeles Airport. Its innovative bid included strategic relationships with nationally famed restaurateur Wolfgang Puck, the Daily Grill, Disney Imagineering, and Los Angeles' locally brewed Rhino Chasers. It operates food, beverage and retail operations at more than 35 airports nationwide including Boston, Cincinnati, Denver International, Ft. Lauderdale and Newark.

CA One Services is a subsidiary of Delaware North Companies Inc., of Buffalo, N.Y., a private, \$1 billion-plus international holding company. Delaware North was recently awarded a contract by NASA to provide a range of services at Kennedy Space Center's Spaceport USA and last year began a similar 15-year pact at Yosemite National Park. The company owns the famed Boston Garden arena and its replacement, the \$160 million FleetCenter, slated to open this October.

After he graduated from Stout, Slaney went to work for the Radisson Hotel Corporation. He worked for Happy Chef's Restaurant in Lincoln, Neb., before starting with Sky Chef's in October 1985 as assistant manager in New Orleans. In April 1987, Slaney was promoted to general manager of Sky Chef's Shreveport, La., operations. The same year, Sky Chef's was purchased by Delaware North.

In April 1990, Slaney transferred to Albuquerque, N.M. as general manager of CA One Services. In August 1993, Slaney moved back to New Orleans, taking over the helm as general manager of CA One Services.

Tim and his wife Carla are the proud parents of one son, Zachary, born in May 1992.

Slaney

Johnson receives consumer service award

Karen Johnson '61 '62, vice president of consumer affairs at Borden Inc., was honored May 9 by the Food Marketing Institute (FMI) as the 1995 recipient of the Esther Peterson Consumer Service Award.

Johnson received the award for "constantly promoting the highest standards of nutrition and food safety with outstanding consumer information programs and helping the entire food industry to better serve consumers," said Bob Bartels, FMI chair and president of Martin's Supermarkets Inc.

FMI established the award in 1986 in the name of the former consumer adviser to three presidents and to Giant Food Inc.

Bartels presented the award at the annual banquet during FMI's International Supermarket Industry Convention and Educational Exposition. He offered the following tribute:

"Karen has been a pioneer in the consumer affairs profession for Borden since 1976 when she established Borden's consumer affairs department. She is the innovator behind the company's consumer response department, which handles over 100,000 inquiries each year about thousands of Borden products. This response system has been emulated by numerous grocery manufacturing companies."

Former award winners include Dr. Jean Mayer, president, Tufts University; Dr. C. Everett Koop, former U.S. Surgeon General; and

Karen Johnson (right) is pictured with Esther Peterson. Johnson was honored with the Esther Peterson Consumer Service Award for her efforts on behalf of consumers.

Alexander Grant, associate commissioner for Consumer Affairs, Food and Drug Administration.

Johnson currently serves on the UW-Stout School of Human Environmental Sciences advisory board, and has established the Karen L. Johnson endowed scholarship for students enrolled at UW-Stout who are preparing for a career in the food service industry.

The UW-Stout Alumni Card

A card that works for the future

An exciting program will be offered to all Stout alumni, students, faculty and staff. The UW-Stout Alumni Association has developed its own MasterCard/VISA, an innovative source of funding for the association.

Every time you use your UW-Stout Alumni Card or UW-Stout Alumni Gold MasterCard, a portion of your purchase goes to support the Alumni Association. So your money is working for you and the Alumni Association, an organization that works for our future.

Not only does the university benefit from the Alumni Card, but you will have a credit card that is competitive with others and serviced locally. The UW-Stout Alumni Association selected WESTconsin Credit Union as the financial institution to issue the Alumni Card.

Alumni Card benefits include:

- Available to alumni, students and those who wish to support the Alumni Association
- No annual fee
- MasterCard or VISA available

The Alumni Gold Card offers:

- \$40 annual fee waived first year
- Minimum credit line of \$5,000
- Air Travel Mile Program with option of airline ticket or \$300 cash back
- Travel Assistance Services
- Retail Protection
- RoadAssist Roadside Service
- Emergency Cash Advance

You also have the option of consolidating current credit cards into the UW-Stout Alumni Card.

For more information about the UW-Stout Alumni Card program, contact the Alumni Office at 715/232-1151 or WESTconsin Credit Union at 715/235-3404.

UW-Stout Alumni Association

Gatherings

Anaheim, California Area graduates gathered in April at the Anaheim/Orange Hilton Suites for a dinner with Pat Reisinger, executive director of the Stout University Foundation. Front (l to r) Paul Schuster '81, Geri Easley '81, Kari Abrahamson '89. Back (l to r) Irv Lathrop '50, Barbara Ingwalsen '80, Patti Kanter '85, William Larson '92 and Pat Reisinger.

Grand Rapids, Michigan Area graduates gathered in May at the Amway Grand Plaza for lunch with the chancellor. (l to r) Julie May Hamstra '86, Ruth Madison Harmon '45, Steve Steelandt '70, Deanna Howell House '61, Chancellor Charles W. Sorensen, Barbara Knauss Zache '63, Jean Bangsberg Mc Omber '42 and Gordon Peterson '79.

Spring season has more ups than downs

Layne Pitt Sports Information Director

As the old sports adage goes, "you win some and you lose some," and the UW-Stout spring sports teams won more than they lost in 1995.

The softball team had one of the biggest reasons to smile. In only their fourth year of varsity existence, the squad finished second in the Wisconsin Women's Intercollegiate Athletic Conference (WWIAC) and posted a best-ever 34-17 record.

Suzanne Brion (Soph., Cameron, Wis.) led the team both at the plate and on the field. A shortstop, Brion led the team in batting average (.464), stolen bases (36-for-39) and received the team's Golden Glove Award (.947 fielding average).

Brion was a second team selection to the National Softball Coaches' Association All-America team.

Joining Brion on the WWIAC West Division first team were catcher **JoJo Schwebach** (Soph., Elmwood, Wis.), outfielder **Missy Boyd** (Sr., Charles City, Iowa), and pitcher **Karen Lien** (Sr., Elmwood, Wis.).

Lien concluded her four year career by holding

every major pitching record with the Blue Devils. She finished the 1995 season with a 24-9 record and a 2.03 ERA.

Boyd, a junior college transfer, was a GTE/CoSIDA District V Academic All-America selection.

The cupboard will not be bare next season for WWIAC Coach of the Year **Cyndi Raymond**. Boyd and Lien are the only seniors.

The baseball team experienced the opposite of the softball squad — their first losing season since 1981. The Blue Devils, fielding an almost entirely freshmen squad, finished at 14-20-1.

Errors plagued Stout from beginning to end as the Blue Devils finished 7-9 in the Northern Division, good for third.

Catcher **Greg Osterhaus** (Sr., Prairie du Chien, Wis.) was named to his fourth straight Wisconsin State University Conference (WSUC) team. Despite a lower than average — average for Osterhaus — year at the plate (.354, 40-for-113), Osterhaus broke a five-year-old career home run record when he plated his 30th career home run. John Filas held the former mark of 29.

Outfielder **Matt Anderson** (Sr., Westby, Wis.)

and designated hitter **Mike Jaje** (Sr., Bryant, Wis.) were also first team selections and both worked their way into the Stout record book.

Anderson, the team's hitting leader (.414), set a career mark in triples, finishing with eight, while Jaje tied a season doubles record with 16.

Anderson and Osterhaus were selected to the NCAA Division III All-Midwest Region second team.

Honorable mention selections were outfielder **Jesse Ison** (Jr., Escanaba, Mich.) and pitcher **Brian Day** (Soph., Stillwater, Minn.).

Terry Anders (Soph., Cornell, Wis.) dominated the conference track season. At the WSUC meet, Anders, the indoor 400-meter national champion, won the 200- and 400-meter dashes in school record time, finished third in the 100 and anchored the winning 4 X 400-meter relay and the second place 4 X 100-meter relay. He was named the WSUC track athlete of the year.

Anders qualified to the national meet in all five events and matched his 400 indoor title by taking the outdoor version in a school record time of 47.93. Anders was also third in the 200-meter. The

Blue Devils finished tenth at the national meet.

Also qualifying to the national meet were relay members **Jesse Witcraft** (Soph., New Lisbon, Wis.), **Mike Hallingstad** (Soph., Sparta, Wis.) and **Chris Valois** (Fr., Anoka, Minn.), pole vaulters **Aaron Fruit** (Soph., Hartland, Wis.) and **Tim Johnson** (Sr., Janesville, Minn.), discus thrower **Keith Blake** (Sr., Seymour, Wis.) and Witcraft in the 200-meter and Hallingstad in the 400-meter.

Fruit set a school pole vault record (15-feet-9.75) to qualify for nationals and a week later, Johnson went the same height. Johnson captured All-America honors by finishing sixth (15-4).

The men's team was third at the WSUC meet. The groundwork has been started for first-year women's track coach Carla "Yogi" Weigel, and while no women qualified nationally, Weigel took comfort in the season.

The women placed seventh at the WWIAC meet where Weigel got solid performances from **Lisa Lindwall** (Jr., Madison, Wis.) in the 10,000 (fourth) and **Erin Washut** (Sr., Buffalo, Wyo.) with a second in the 400-hurdles. Washut missed the national qualifying time by tenths of a second.

1. Karen Lien earned all-conference honors by pitching her way to a 24-9 overall record.
2. Shortstop Suzanne Brion was named as a second team All-America selection.
3. Senior Erin Washut came up tenths of a second short of qualifying to the national track and field championships in the hurdles.
4. Matt Anderson led the Blue Devils at the plate with a .414 batting average.
5. Terry Anders crosses the finish line in the 4 X 400-meter relay at the WSUC track and field meet. Anders is the 400-meter outdoor and indoor national champion.

Blue Devils Fall Schedule

Saturday, September 2

Volleyball at Oshkosh, 2 p.m. and 4 p.m. vs. Oshkosh and Millikin
Football at Duluth, 1 p.m.
Cross Country vs Alumni, 11 a.m.

Wednesday, September 6

Volleyball vs. St. Catherine's, 7 p.m.

Friday, September 8

Volleyball at Elmhurst (Ill.) Tournament, TBA
Soccer at Macalester JV, 4 p.m.

Saturday, September 9

Volleyball at Elmhurst (Ill.) Tournament, TBA
Football at Valley City, North Dakota, 1 p.m.
Cross Country at River Falls, 11 a.m.

Sunday, September 10

Soccer vs Augsburg, 1 p.m.

Wednesday, September 13

Tennis at River Falls, 3 p.m.
Soccer vs Stevens Point, 4 p.m.

Friday, September 15

Volleyball at College of St. Benedict Tournament, TBA
Tennis at Marion, 3 p.m.
Soccer at Edgewater College, Madison, 7 p.m.

Saturday, September 16

Volleyball at College of St. Benedict Tournament, TBA
Football vs. Bemidji State, 7 p.m. (Parent's Day)
Cross Country hosts Blue Devil Invite, 11 a.m.

Sunday, September 17

Soccer vs. Platteville, 1 p.m.

Wednesday, September 20

Soccer at La Crosse, 4 p.m.

Thursday, September 21

Tennis at Ripon, 3 p.m.

Saturday, September 23

Volleyball vs. Eau Claire and Whitewater, 12 Noon, 2 p.m., 4 p.m.
Tennis vs. Whitewater, 9 a.m.
Soccer at Martin Luther, 1 p.m.
Cross Country at Augustana, Noon

Wednesday, September 27

Tennis at Eau Claire, 3:30 p.m.

Friday, September 29

Volleyball at Eau Claire Tournament, TBA
Tennis vs. Bethel, 3 p.m.
Cross Country at Carleton, 4:30 p.m.

Saturday, September 30

Volleyball at Eau Claire Tournament, TBA
Soccer at Oshkosh, 4 p.m.
Football vs. River Falls, 1 p.m.

Sunday, October 1

Soccer at Whitewater, 2 p.m.

Wednesday, October 4

Tennis vs. La Crosse, 3 p.m.
Soccer vs Eau Claire, 4 p.m.

Friday, October 6

Cross Country vs. Eau Claire at Colfax, 4:30 p.m.

Saturday, October 7

Volleyball at Oshkosh vs. La Crosse and Oshkosh, 2 p.m. and 4 p.m.
Tennis vs. Oshkosh, 10 a.m.
Soccer at St. Norbert, Noon
Football at Stevens Point, 1 p.m.

Sunday, October 8

Soccer vs. Superior, 2 p.m.

Tuesday, October 10

Soccer at River Falls, 4 p.m.

Wednesday, October 11

Volleyball vs. Superior, 7 p.m.
Tennis vs. River Falls, 3 p.m.

Friday, October 13 (Homecoming)

Volleyball hosts Stout Tournament, TBA

Saturday, October 14 (Homecoming)

Volleyball hosts Stout Tournament, TBA
Tennis vs. Stevens Point, 3 p.m.
Soccer vs. Northwestern, 4 p.m.
Football vs. Whitewater, 1 p.m.
Cross Country vs. La Crosse at West Salem, 10:30 a.m.

Monday, October 16

Soccer at Mankato, 3 p.m.

Wednesday, October 18

Volleyball at River Falls, 7 p.m.

Friday, October 20

Soccer vs. St. Cloud, 4 p.m.
Cross Country vs. Eau Claire, 4 p.m.

Saturday, October 21

Volleyball at Stevens Point vs. Platteville and Stevens Point, Noon, 2 p.m.
Football at Eau Claire, 1 p.m.

Friday, October 27

Volleyball at River Falls Tournament, TBA
Tennis at WWIAC Meet at Madison, TBA

Sunday, October 29

Soccer at WWIAC Meet at La Crosse, TBA

Saturday, November 4

Football vs. Platteville, 1 p.m. (Hall of Fame)

Saturday, November 11

Football at Oshkosh, 1 p.m.
Cross Country NCAA Regional at Oshkosh, 11 a.m.

Saturday, November 18

Cross Country NCAA National at La Crosse, 11 a.m.

Alumni News

'39 grads reminisce

On June 9, four graduates of the class of '39 met at the home of Margaret (Watson) Sandberg in Karlstad, Minn., for a weekend of reminiscing and talking over old times at Stout. Those who came to renew friendships were: Jean (Snoyenbos) Batterman of Neenah, Wis.; Marian (Turner) Ortmayer of Whitewater, Wis.; and Marcia (Blank) Sopkowiak of New Richmond, Wis.

Survival Skills for a Changing Business Environment II

2nd Annual Fall Conference
Friday, October 13, 1995
Homecoming Weekend

Sponsored by
UW-Stout's Business Department

The conference will include four 1½ hour sessions in the following areas of finance, management and logistics.

"Using Distribution Management for Competitive Advantage"
by Karen Ferree

"Activity Based Costing for Non-accountants"
by Jerry Lehman

"A User Friendly Guide for Implementing Work Teams"
by Jerry Coomer

"Using the NTDB for Management Decisions"
by Dennis Vanden Bloemen and Joe Maglio

Gain valuable hands-on experiences to better understand the future business environment. The primary target market selected for the conference is graduates of Stout's business, marketing, education, logistics and sales programs.

Cost of the conference is \$85 through Oct. 4 and \$90 after that date. Materials, continental breakfast, lunch, reception and parking is included. Seating is limited.

For more information about the conference, contact: Gail Kann at 715/232-1155 or Wayne Nero at 715/232-1111.

Class Notes

1950 - 1969

Karl '50 and Jean Pengilly Windberg '52, Waukegan, Ill., are both retired from teaching but are still involved in substitute teaching at the high school level and at the technical campus in Grayslake. They enjoy traveling which has included several trips to Canada with their Airstream trailer group.

John BS '55, MS '62 and Barbara Brown Rynders '57 reside in New Brighton, Minn. John, a professor at the University of Minnesota, will be participating in a USIA grant doing policy research at Bar-Ilan University in Israel for two months. Barbara will be involved in volunteer activities through Bridges for Peace, a support group for the State of Israel.

Jeanette Kramer BA '60, MS '76 has retired from Rice Lake Senior High School after 24 1/2 years of service as a family and consumer education teacher.

Joann Schoemer Paroz '61, Albuquerque, N.M., has retired after 30 years with Albuquerque Public Schools as a teacher, Parent Center coordinator and special education administrator. She has accepted a position as a learning disabilities specialist at the International School of Tanganyika and will leave in August for Dar es Salaam, Tanzania.

Karen Kardin Jordahl '64 has moved from California to Mequon, Wisconsin, where she is a certified marriage and family therapist.

Dorothy Hagen Bird '66 represented UW-Stout and Chancellor Sorensen April 28 at the inauguration of John C. Stockwell as the second chancellor of the University of South Carolina-Spartanburg.

Carl Gehring MS '67, Prescott, Ariz., recently celebrated his 80th birthday and was honored by Lions International for 50 years of service. Donna Rice Grabow '67, Claremore, Okla., is director of programs for Rogers County Community Service Center Inc. and is also the business manager for the Oklahoma Early Childhood Association. Lee BS '67, MS '68 and Barbara Schellin Kornely '67 reside in Beaver Dam where they are the owners of Kornely's Craft Center. Lee is head of the arts and crafts department at Wisconsin Correctional Institute in Fox Lake; Barbara represents the nation's small craft retailers on the board of directors of the Association of Craft and Creative Industries. Anthony Schwaller BS '67, MS '68 received the Special Recognition Award for outstanding service to the International Technology Education Association at the ITEA conference in Nashville, Tenn. He has recently been appointed director of Institutional Assessment at St. Cloud State University, St. Cloud, Minn., and has published his second textbook, *Transportation*, which is designed for middle school technology education programs.

Thomas Burmeister '69, Evansville, Ind., represented UW-Stout and Chancellor Sorensen March 17 at the inauguration of H. Ray Hoops as the second president of University of Southern Indiana. Paul Husby '69 has recently been appointed managing director of 3M do Brasil Ltda.

1970 - 1974

Loren Jensen '70 has been promoted to product support manager, Product Sales Group, Jervis B. Webb Co., Farmington Hills, Mich. Clifton Newberry MS '70, Ed.S. '85, Buckeye, Ariz., presented a special interest program, "Identification and Verification of Cognitive and Psychomotor Competencies Essential for Beginning Technology Education Teachers," at the International Technology Education Association Conference in Nashville, Tenn. Karen Kanno Offerdahl '71, Honolulu, Hawaii, is a life insurance agent for Mass Mutual. Thomas '70 and Jane Wells Rebne '71 have moved to Phoenix, Ariz., where Thomas is a senior packaging engineer with Schein Pharm. Inc. Daniel Stewart BS '70, MS '71, Greenwood, Ind., is director of business development at Advanced Rehab Systems Inc.

Gordon Taylor '71, Eagan, Minn., has been appointed programs director for the Saint Paul Festival and Heritage Foundation. He is responsible for the 100+ events which are part of the annual Winter Carnival festival and corporate sponsorship and grants development. Catherine Johnson Van Landuyt '71, Racine, was elected president of the Racine-Kenosha Home Economics Association.

James Bruner '72 is food service director for ISD 709, Duluth, Minn. David Goetzinger '72 is a senior

manufacturing engineer at John Deere Dubuque Works, Dubuque, Iowa. Lona Holsen Kluge '72 was named "Outstanding Educator" for the grades pre-kindergarten through 6 category at District 833, Woodbury, Minn. Lona has been a parent educator with District 833's Early Childhood Family Education program for the past eight years, as well as the School Age Family Education lead teacher for the past four years. Richard Konetski '72 is associate dean of students at Glenbrook South High School, Glenview, Ill. Jill Trzcinski Walker '72, Kingston, was named the Gordon Ellis Outstanding Counselor Education Graduate Student at UW-Oshkosh in April. She received a master's degree in school counseling in May. Rosanne Cuda Weber BS '72, MS '79, Wausau, has been named assistant principal at Black River Falls High School.

James Arndt '73, Duluth, Minn., has received a master's degree in educational administration - principalship from UW-Superior. Mary Holl Berg '73, Green Bay, has received her master's degree in creative arts in learning from Lesley College, Cambridge, Mass. She teaches family and consumer education for Ashwaubenon Public Schools. Karl '73 and Kathy Walter Edman '73 have moved to Denton, Texas. Karl has been promoted to manager of supplier quality at PACCAR. Charles Tate MS '73, Montgomery, Ala., represented UW-Stout and Chancellor Sorensen April 28 at the inauguration of William H. Harris as the tenth president of Alabama State University. Barbara Nilssen Griffiths '74, Danville, Pa., represented UW-Stout and Chancellor Sorensen April 22 at the inauguration of Jessica Sledge Kozloff as the 18th president of Bloomsburg University of Pennsylvania.

1975 - 1979

Judy Jones Krueger '75, Green Bay, is director of the Ashwaubenon Cooperative Nursery School which has recently achieved accreditation by the National Academy of Early Childhood Programs. Karen Gliscinski Shirer '75 has been awarded a Ph.D. in family and consumer sciences education from Iowa State University, Ames, Iowa. She is currently an assistant director for the Iowa State University Cooperative Extension Service.

Mary Kay Stolarczyk Anderson '76, Whitefish Bay, has received a master's degree in education from Cardinal Stritch College, Milwaukee.

Rosemary Wenzel West '77, Las Vegas, Nev., was promoted to intra-agency program specialist for Nevada Cooperative Extension where she will be designing data-based evaluation and tracking systems. Glen BS '78, MS '87 and Barbara Schaeppi Esterholm '79 reside in Corpus Christi, Texas. Glen is a safety coordinator for Coastal Refining.

Andrew Kangas '78, Green Bay, is president of AK Enterprises, an independent contractor business which provides the printing and converting industry with hands-on printing technical expertise and professional managerial support. Randy Naffin '78 has been appointed director of sales for the Western Region of Continental/Silite International. He is based in Temecula, Calif. Walter Peterson '78 has been promoted to director of sales-Mexico at Riverwood International Corp., Atlanta, Ga. Sheila Ruhland '78 has been awarded the College of Education Outstanding Graduate Teaching Award at the University of Missouri-Columbia. She is an assistant professor in the College of Education where she teaches undergraduate and graduate courses in marketing and vocational education.

Thomas Bohmke '79 is a senior product manager at Dobby Packaging Machinery Inc., New Richmond. Patricia Nolt '79, Plymouth, Minn., is manager of the Trade Show Division at Technology Exchange Inc. She is primarily responsible for producing MIDPAK, the only Midwestern packaging and materials handling exposition, in addition to launching new trade shows in Minnesota.

Peterson Relatives Sought

The late Bill Peterson, class of '47, has been named to UW-Stout's Athletic Hall of Fame. Unfortunately, the university has no addresses for his family members to accept the award. Anyone knowing the whereabouts of any of his family members is asked to call Mike Ritland at 715/232-2283.

1980 - 1983

Richard Blyth '80 was promoted to general manager at Wyndham Sugar Bay Resort, St. Thomas, U.S. Virgin Islands. Sheila Larson '80 is a customer service agent for Northwest Airlines at the Minneapolis/St. Paul International Airport. Carol Tollefsen Mooney BS '80, MS '84, Eleva, has earned a doctorate in vocational education from the University of Minnesota. Steve Ronkowski '80 is the owner of Engineering Results Inc., Maplewood, Minn. Carol Friesen Schroeder MS '80, Greenfield, Ind., is an epidemiologist with the Indiana State Department of Health. Nancy Helmer Skifstad '80, Atlanta, Ga., represented UW-Stout and Chancellor Sorensen April 5 at the inauguration of William Chace as the 18th president of Emory University.

Christopher Bracken '81, Ponte Vedra Beach, Fla., is director of marketing for the Marriott at Sawgrass Resort. Norman Green '81 has joined Documentation LLC of Eau Claire as regional sales manager. Rhonda Johannesen '81, Memphis, Tenn., was promoted to corporate marketing director at Allen & O'Hara Inc., a national construction, real estate development and management company. John Stewart '81 is technical recruiting manager for Eagle Technology Group, West Allis.

Julene Flanagan Piechocki '82 was promoted to office manager at Crown Employment Services, Milwaukee. Lois Scott Poulos '82, Hoffman Estates, Ill., is an area manager for Pizza Hut.

Michelle Hemauer Kozloski '83, Chicago, Ill., is employed by Kraft Foods as manager, Leadership Development—Corporate Human Resources Development. Kim Milliren '83, is general manager at Drury Inns Inc., St. Louis, Mo. Michael Ruth MS '83 represented UW-Stout and Chancellor Sorensen April 7 at the inauguration of Roland Eugene Barden as the ninth president of Moorhead State University, Moorhead, Minn. Lori Hubbard Zierl BS '83, MS '92, Durand, is the family living agent for Pierce County.

1984 - 1988

Sandra Wazny Klein '84, Shawnee, Kan., is a day care provider.

Lorreen Becklund '85, Milwaukee, plans to complete her master's degree in special education at Cardinal Stritch College in August. She is presently a teacher of autistic/emotionally disturbed students for Milwaukee Public Schools. Barbara Bunday Fontaine '85, Plymouth, Minn., is a product control manager at Fingerhut Corp. Melinda McWilliams Klebe '85 is a buyer for Owens & Minor Inc., Mounds View, Minn. Charles McGinnis '85, has been named vice president and general manager of North American Mechanical Services, Madison. Allen '85 and Maria Houtz Schoenborn '85 reside in Fond du Lac, where Allen is a manufacturing engineer for Mercury Marine. Michael Skaltzky '85 is a senior packaging engineer with CarboMedics, Austin, Texas.

Kent Barrett '86, St. Charles, Ill., is general manager/owner of Lincoln Telecom which provides public communications equipment to industry and businesses throughout Chicago and suburbs. Richard '86 and Paulette Lilla Cummins '86 reside in Taylorville, Ill. Richard is a plant engineer at Mueller Co.; Paulette is an account representative for DonTech Publishing. Myron Geiser '86 is manager of package development at Keebler Co., Elmhurst, Ill. Leslie Berenschot Goodnetter '86 is the store manager of Gymboree, Mayfair Mall, Wauwatosa. Bruce Ludwitzke '86 is an electro-mechanical technician in systems manufacturing at Laser Machining Inc., Somerset. Craig Schultz '86, Muscatine, Iowa, has received a master of business administration degree from St. Ambrose University. Karen Weaver Spindler '86, Wauwatosa, has been promoted to senior director of human resources at Hyatt Hotels and Resorts. Kristin Shirley Wood '86, Waterville, Minn., is a parenting mentor for Waseca County Collaborative for Families.

Nancy Rossman Barwick '87 has earned a master's degree in dietetics from Mount Mary College, Milwaukee. Diane Jones '87 is a project assistant for consumer affairs with The Strategic Alliances Group, Madison. Glen Ness '87 is branch manager of

Ames Home Loan, Orango, Calif. **Jeffrey Reames** '87 is the fire/rescue services coordinator in the Public Safety Services Section of the Human Resources Division of Western Wisconsin Technical College, La Crosse.

Rebecca Carter '88, is assistant manager at Froelich's Sayner Lodge, Sayner. **Dennis Gohla** '88, Oak Creek, is a project engineer for General Motors Corp., Delphi-E Division. **Heidi Hable** '88, Bloomer, will be overseas until July 1996 serving as the assistant to the resident director for the Wisconsin in Scotland program. **Thomas Lehnen** '88 has been promoted to director of meeting service and catering at the Wyndham Palm Springs Resort, Palm Springs, Calif. **Todd Magolan** '88 is a product engineer for Masland Industries, Sheboygan. **Nancy Noesen** '88 was promoted to associate buyer at Sportmart, Wheeling, Ill. She has completed her master's degree coursework at Cardinal Stritch College in Milwaukee and is currently working on the thesis. **Traci Stefanc** '88, Chicago, Ill., has been promoted to senior store planner at Montgomery Ward. **Scott Stuckey** '88, Strongsville, Ohio, has been promoted to senior assistant manager at the Stouffer Renaissance Cleveland Hotel.

1989 - 1990
